

Main project_1_Output

My Project first appearance:

The homepage of application features login and registration buttons to navigate.

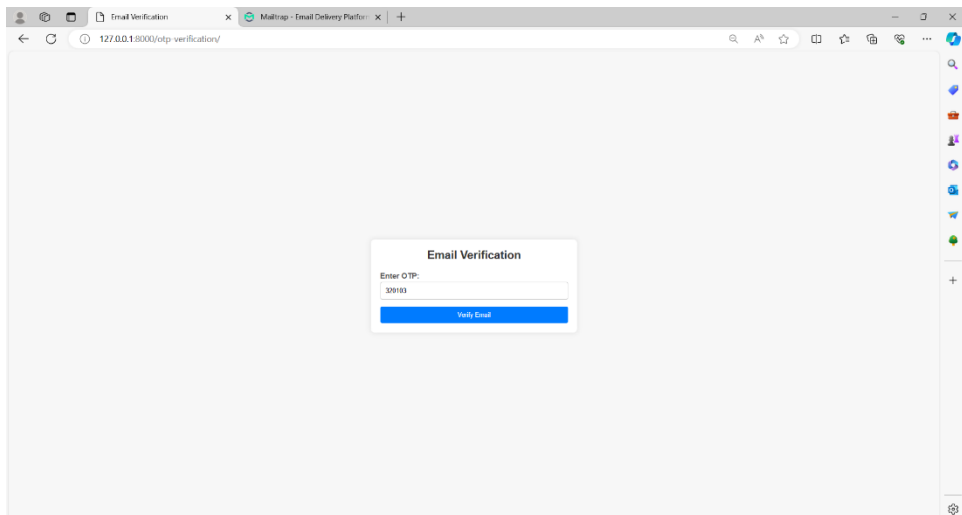

Registration Page:

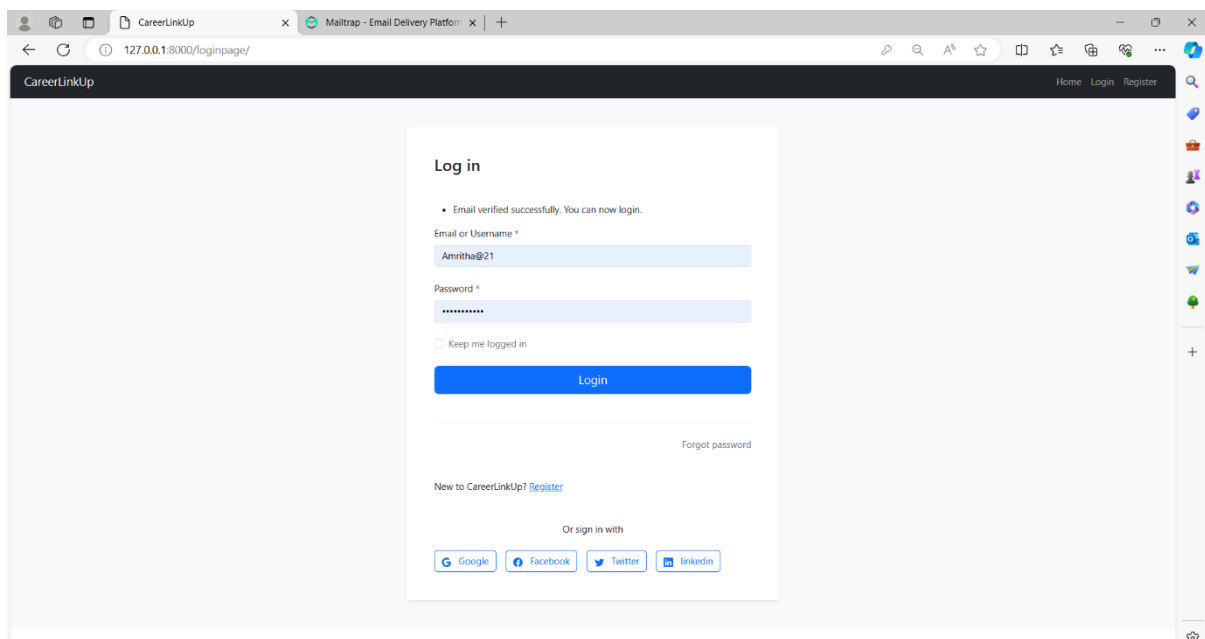

- The registration page allows new users to sign up for an account.
- Users can fill out a form with required information such as username, email, password, etc.
- Includes OTP verification for added security.

A screenshot of the CareerLinkUp registration page. The page has a light gray background. On the left, there's a "Register" form with the following fields: Full Name (Amartha A.), Username (Amartha@21), Email ID (sulejjeal21@gmail.com), Password (masked with dots), Repeat your password (masked with dots), and a dropdown menu for "Are you an Employee or a Job Seeker?" (Job Seeker). Below the dropdown is a checkbox for "I agree all statements in Terms of service". A blue "Register" button is at the bottom. On the right, there's a colorful illustration of a person sitting on a large stack of books, with a speech bubble and a lightbulb above them. The browser's address bar shows "127.0.0.1:8000/register/".

- After Registration redirect to verification page.

- After successful OTP verification, it redirects to Login Page.

- The Login Redirects Based on user type if it is jobseeker redirect to below page:
- The new users are only accessing main page after profile creation.
- If existing user, it will redirect to main page after login.

[Edit Profile](#) [Back to Home](#)

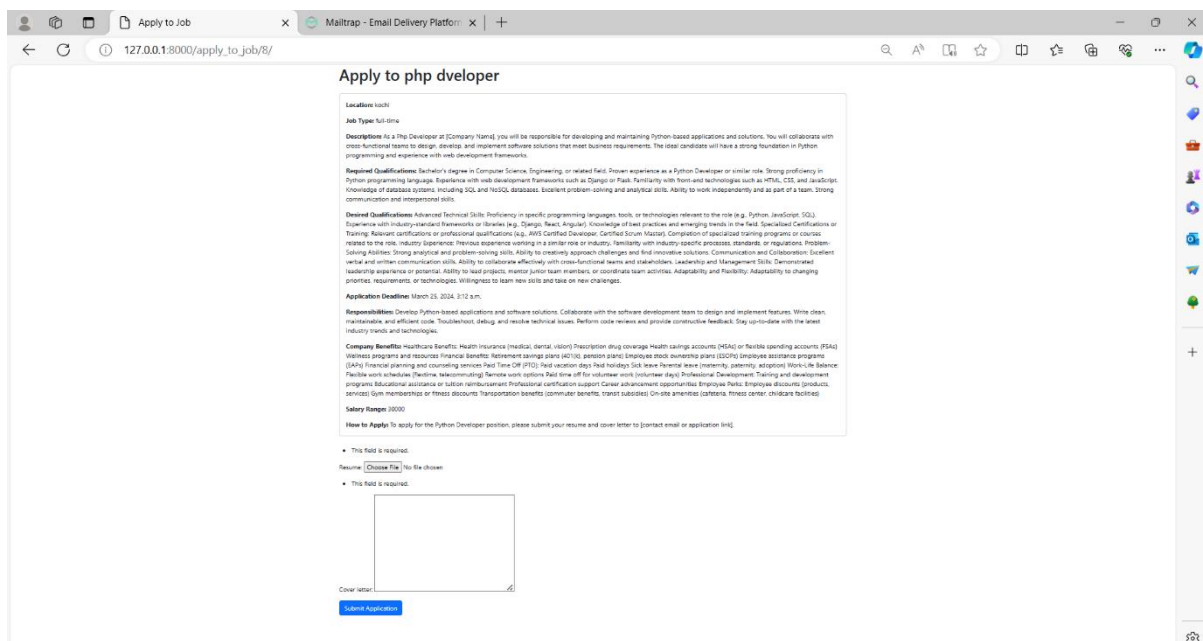

Here we can edit profile and update. And back to page.

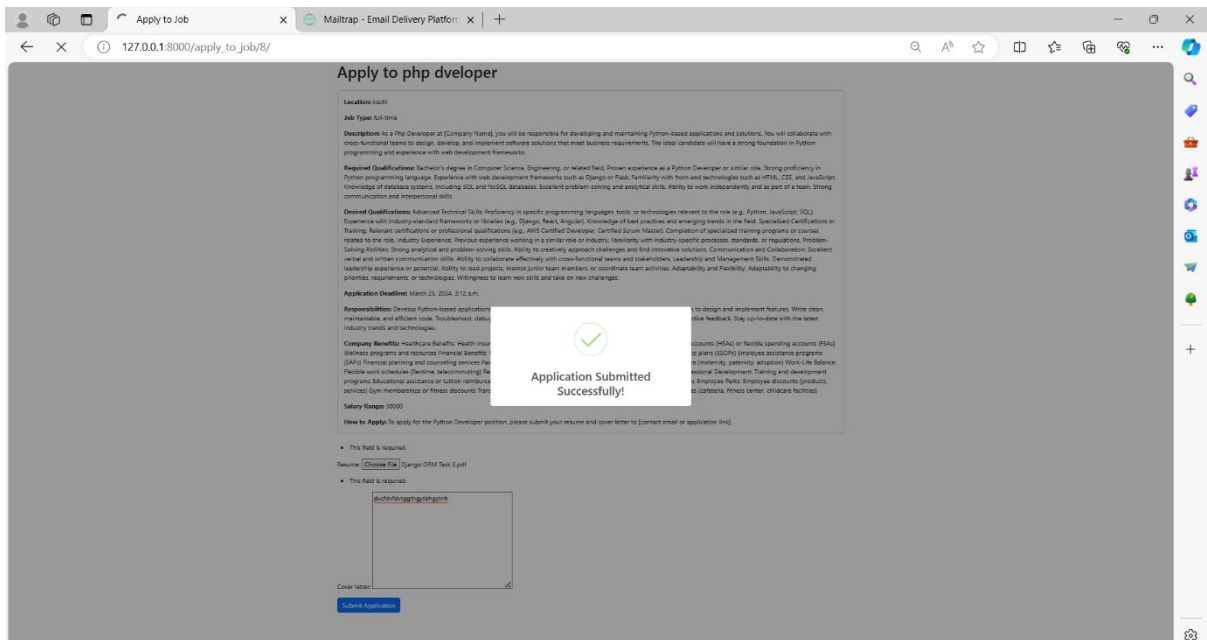

Main Page of Jobseeker:

Apply for Job Interface:

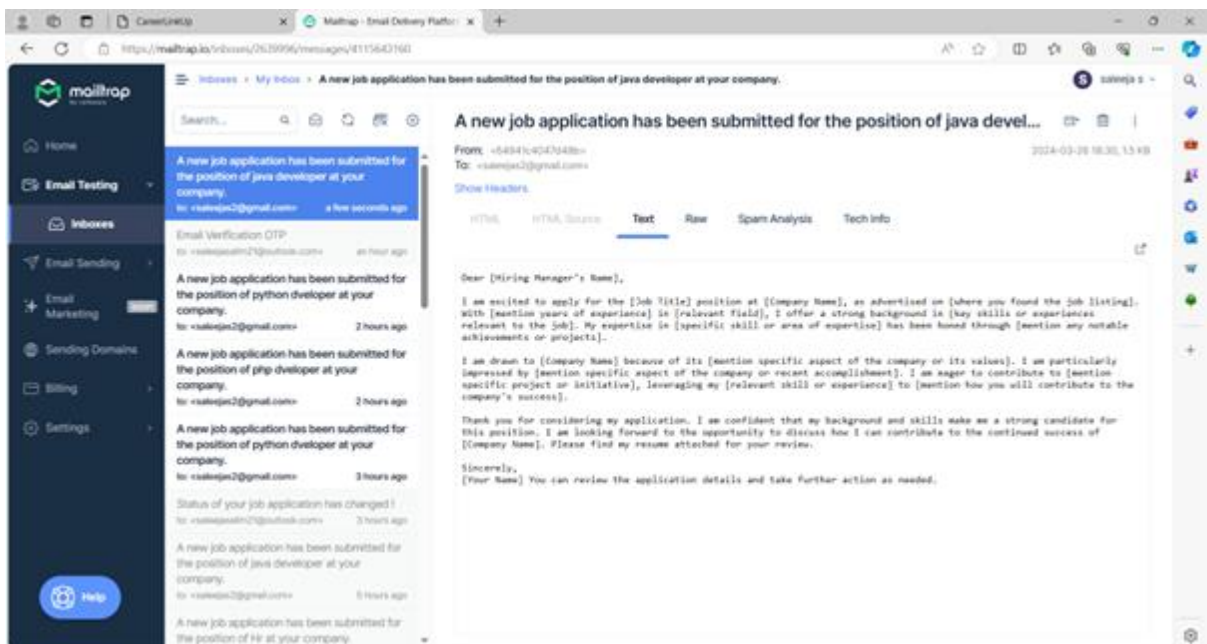

- When a job seeker finds a job listing, they are interested in, they can click on "Apply for Job," leading them to an application submission interface.
- Here, they can submit their job application, including relevant resume and cover letter.

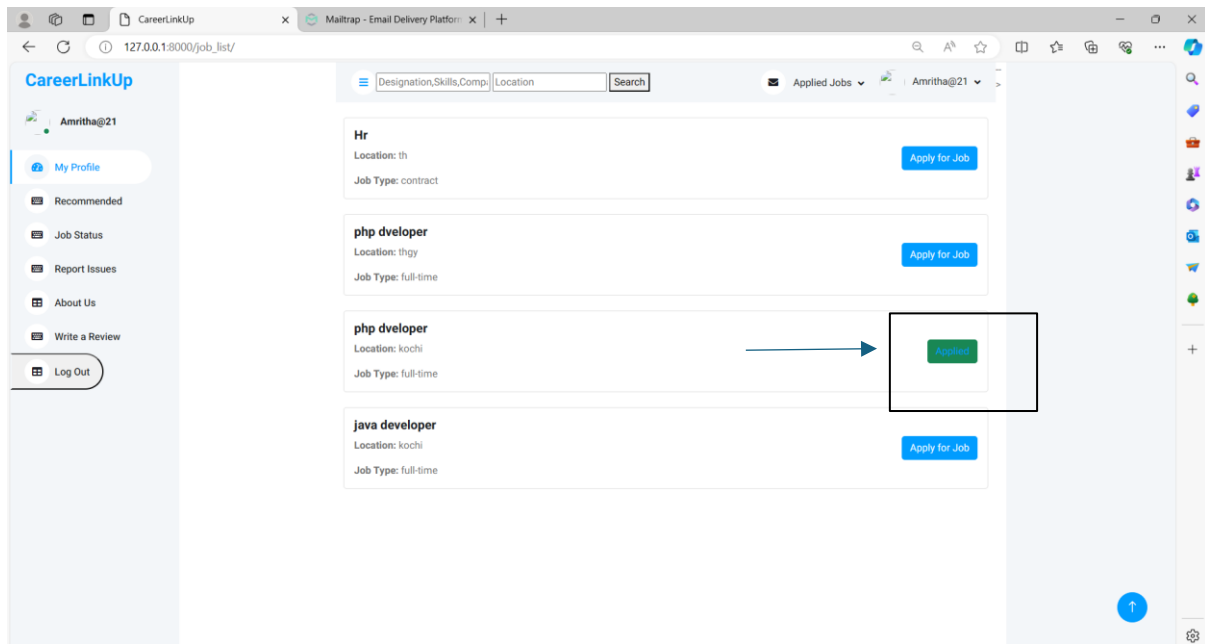

Job Application Submission:

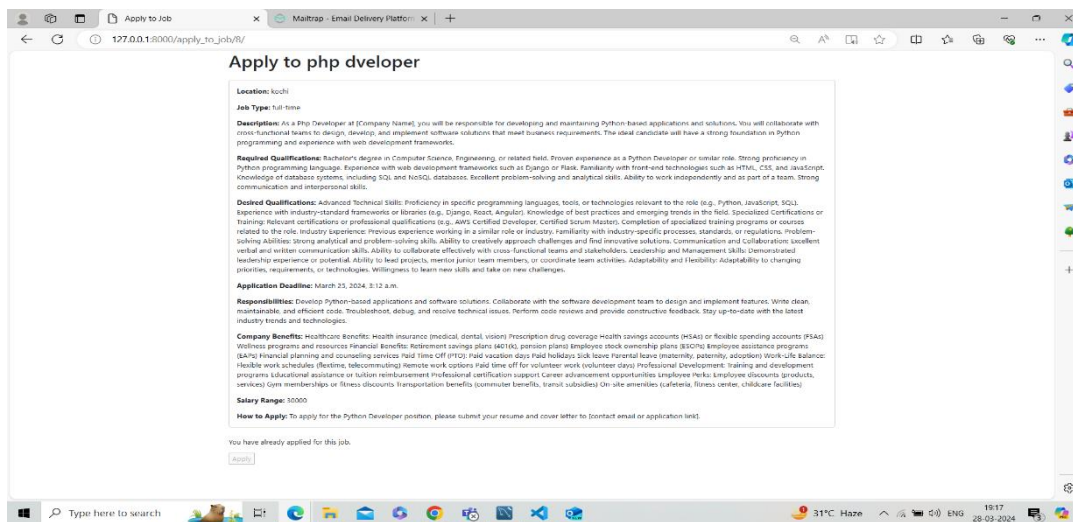

- The job seeker submits application for a job opening.
- Upon successful submission, an email is automatically sent to the recruiter. This email typically contains details such as the job title and cover letter attached by the applicant.

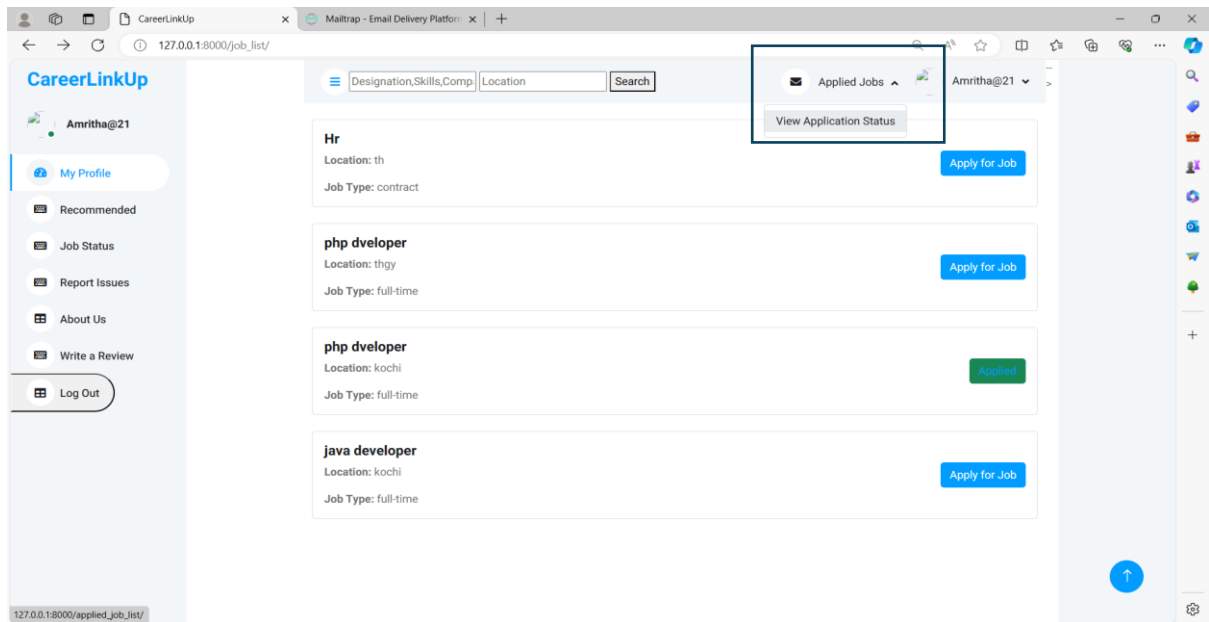

- After successful job submission it redirects to job listing page.

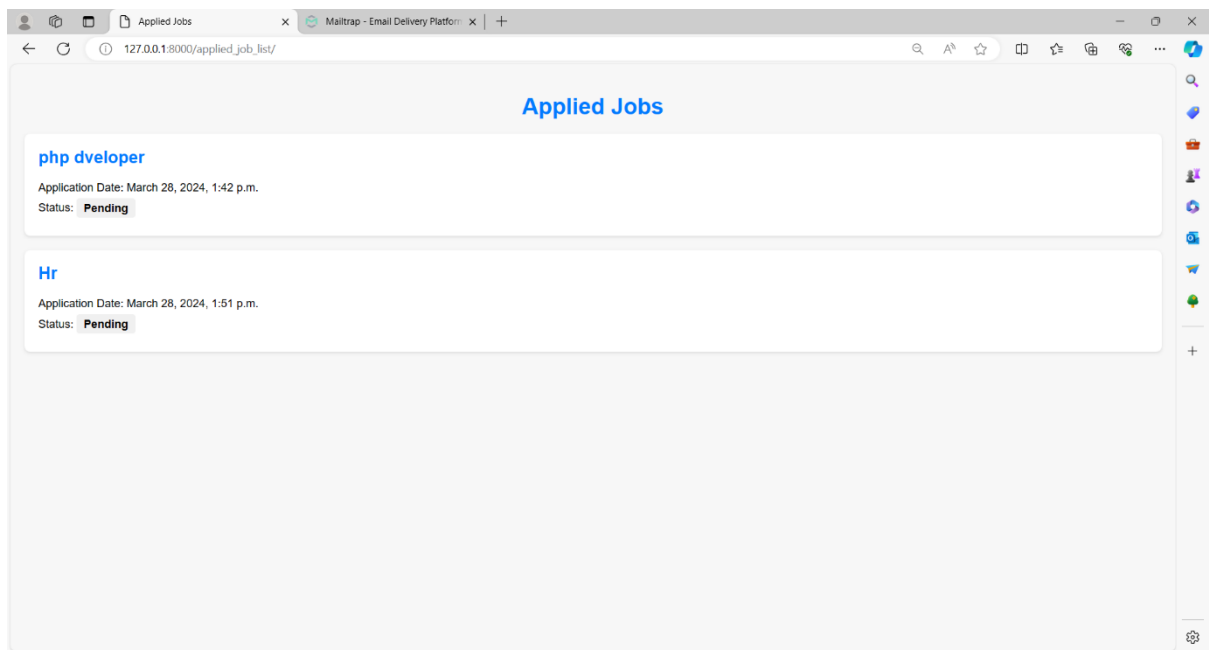

When click on applied job it shows like below interface.

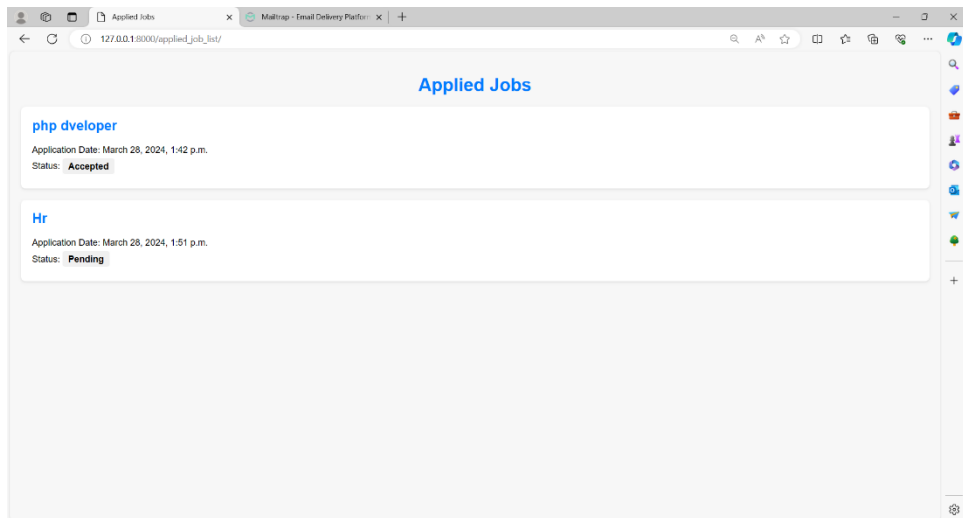

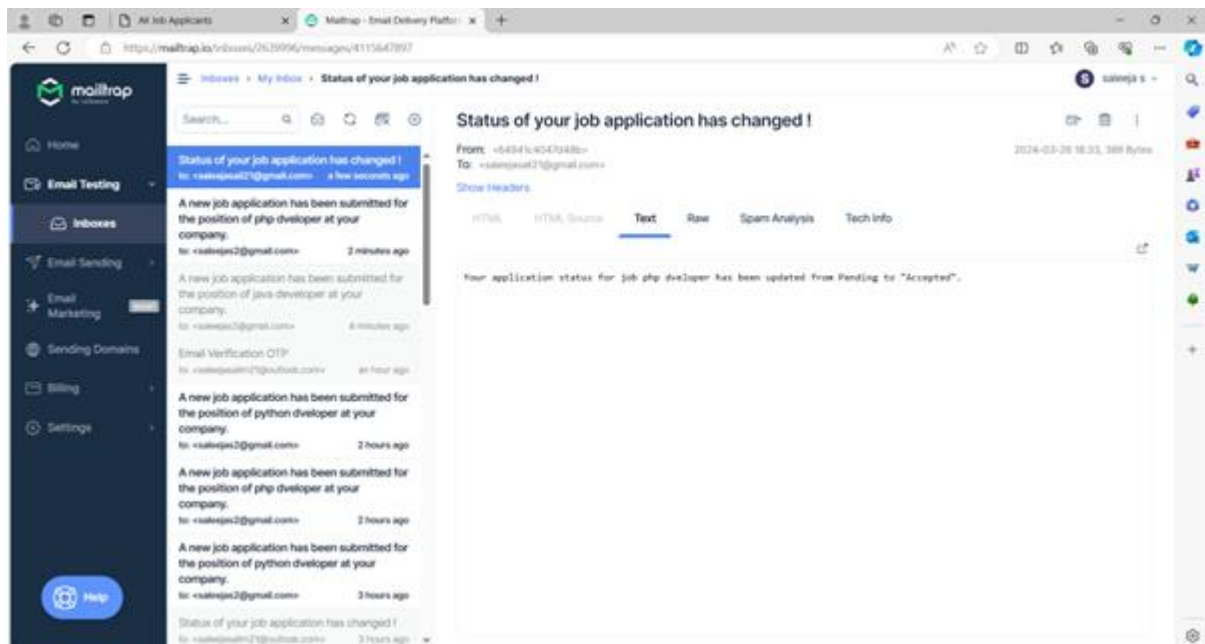

When click on applied jobs we can see the applied jobs list.

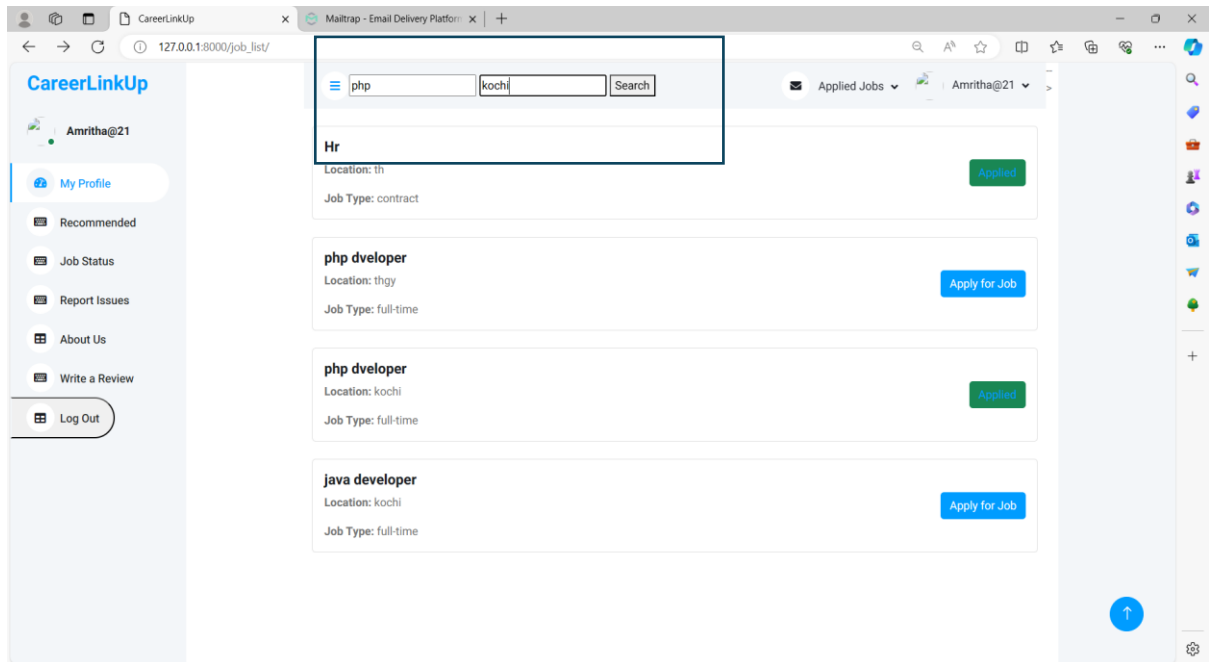

when recruiter update status. status will change.

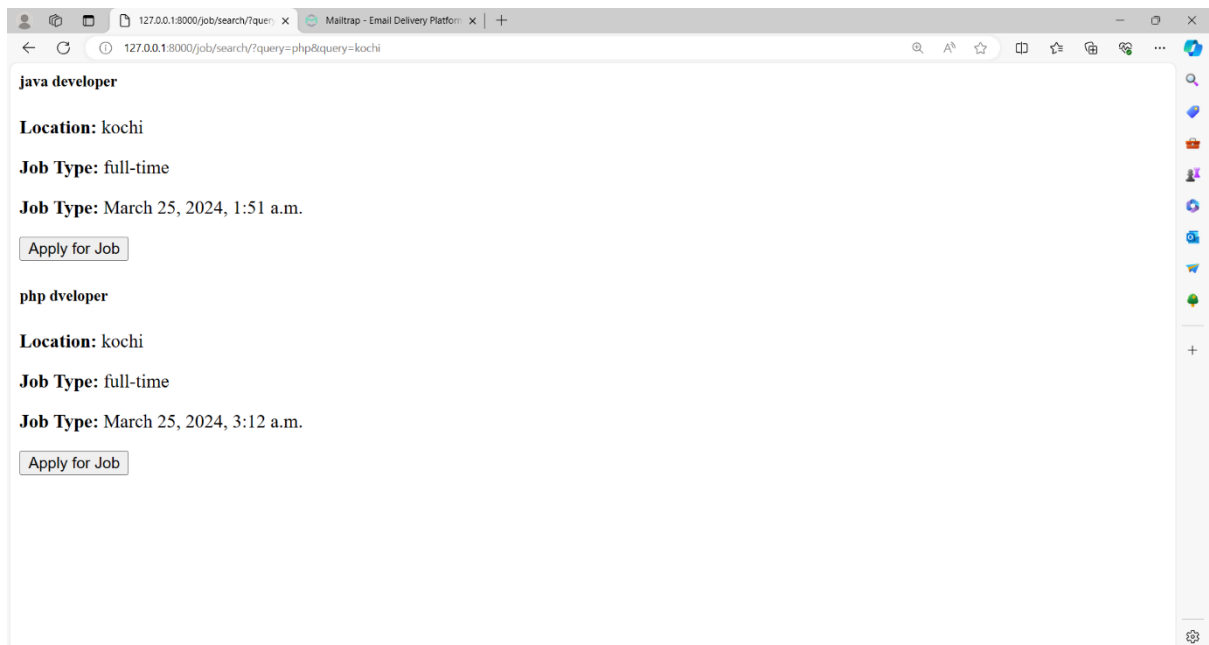

- If the recruiter updates the status of application, an email is automatically sent to the jobseeker.

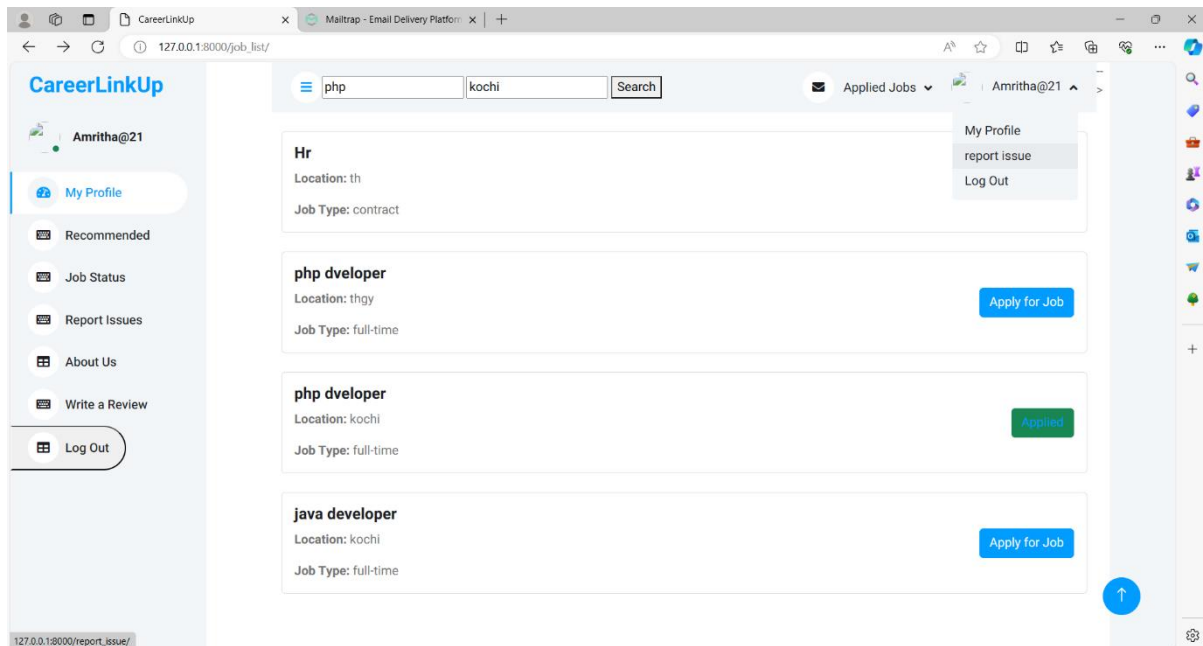

We Can Search Jobs:

Searched based on results.

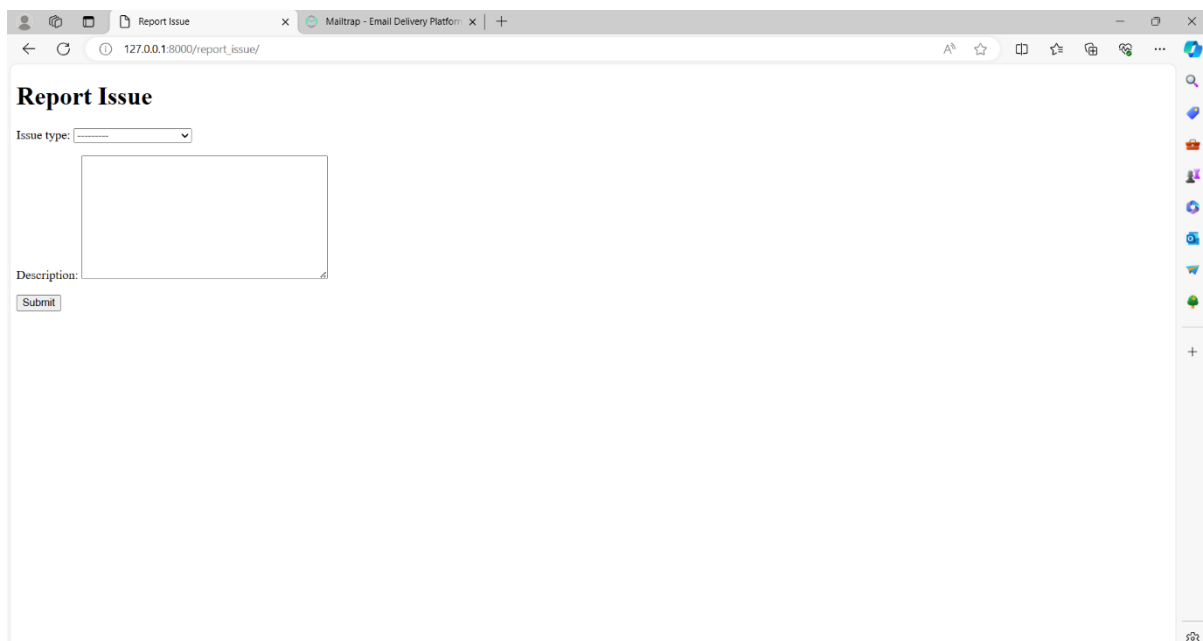

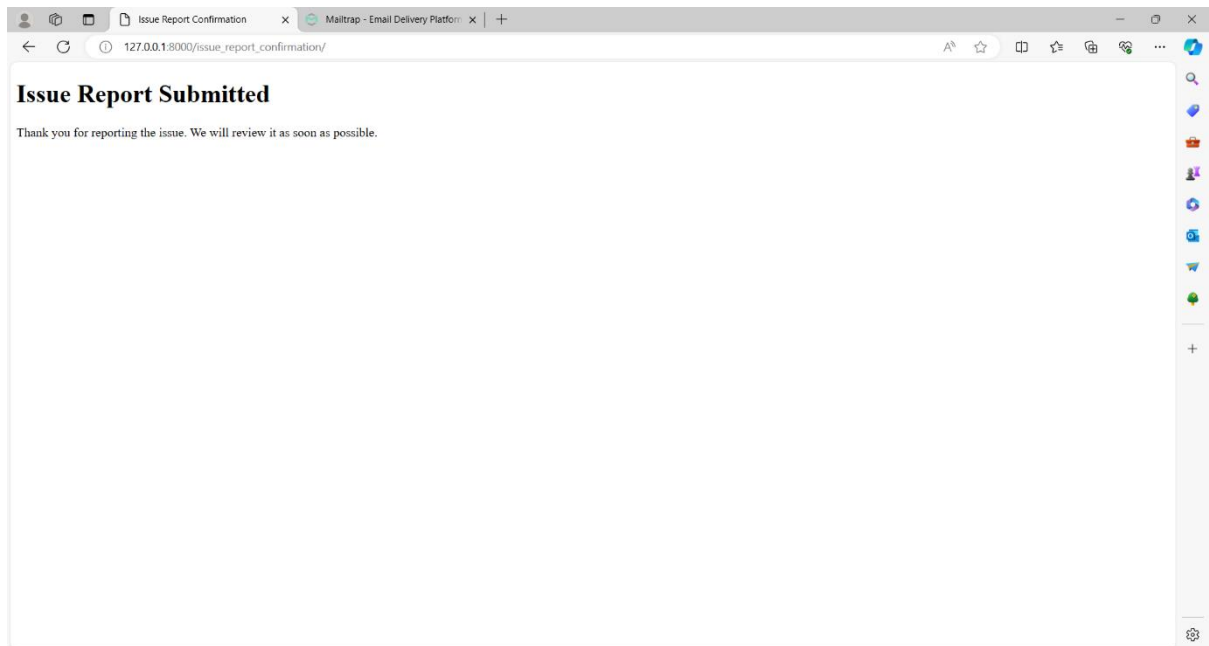

Here the option for Report issue, my profile, logout.

Report Issue:

- Users can report any problems they encounter.
- This option lets users tell us if something is not working right.

My Profile:

- Users can view and update their personal information.
- They can change their name, contact details, and more here.

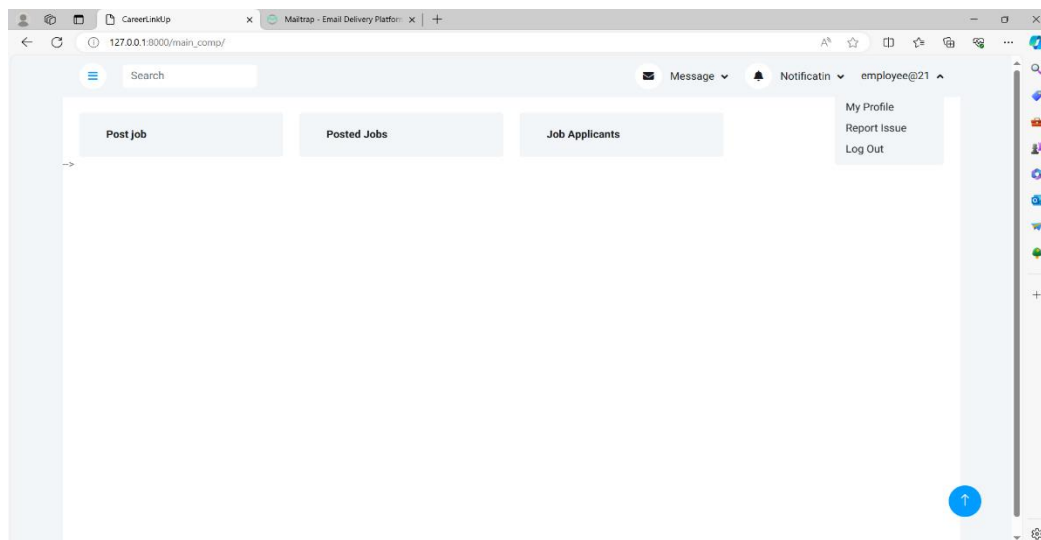

Logout:

- This option logs users out of their accounts.
- It is used when they are done using the website or want to switch accounts.

The login and registration process are the same for both job seekers and employers.

The login page redirects to respective employer or job seeker login pages based on the user type provided during registration.

Employee Main Page:

Post job interface:

Here, we can create jobs.

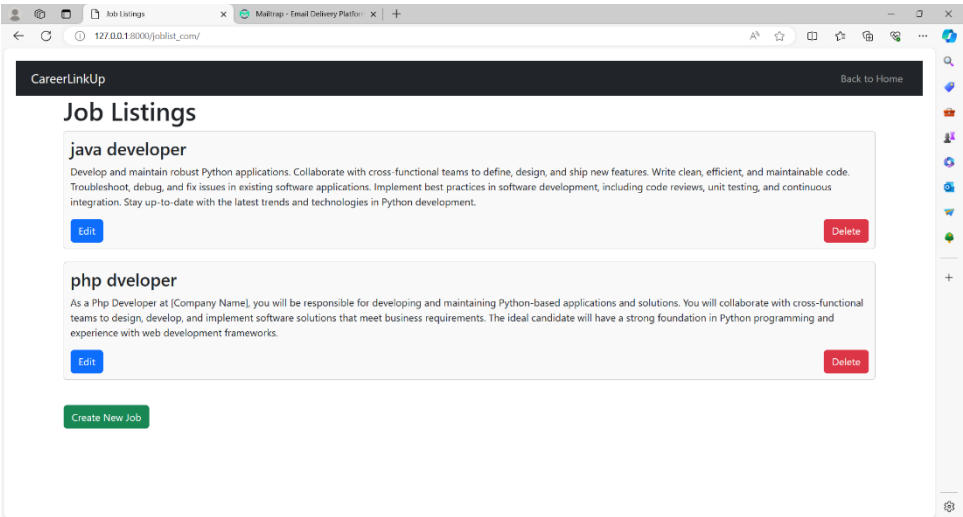

The screenshot shows a web browser window with two tabs: 'Create Company Profile' and 'Mailtrap - Email Delivery Platform'. The address bar displays '127.0.0.1:8000/create/'. The page has a title 'Create job'. Below the title, there are four input fields with labels: 'Title:', 'Description:', 'Required qualifications:', and 'Desired qualifications:'. Each label is followed by a text input area. The 'Description:', 'Required qualifications:', and 'Desired qualifications:' fields are larger and have a small icon in the bottom right corner, suggesting they are rich text editors. The 'Title:' field is a standard text input. The page is otherwise empty.

Posted Jobs Interface:

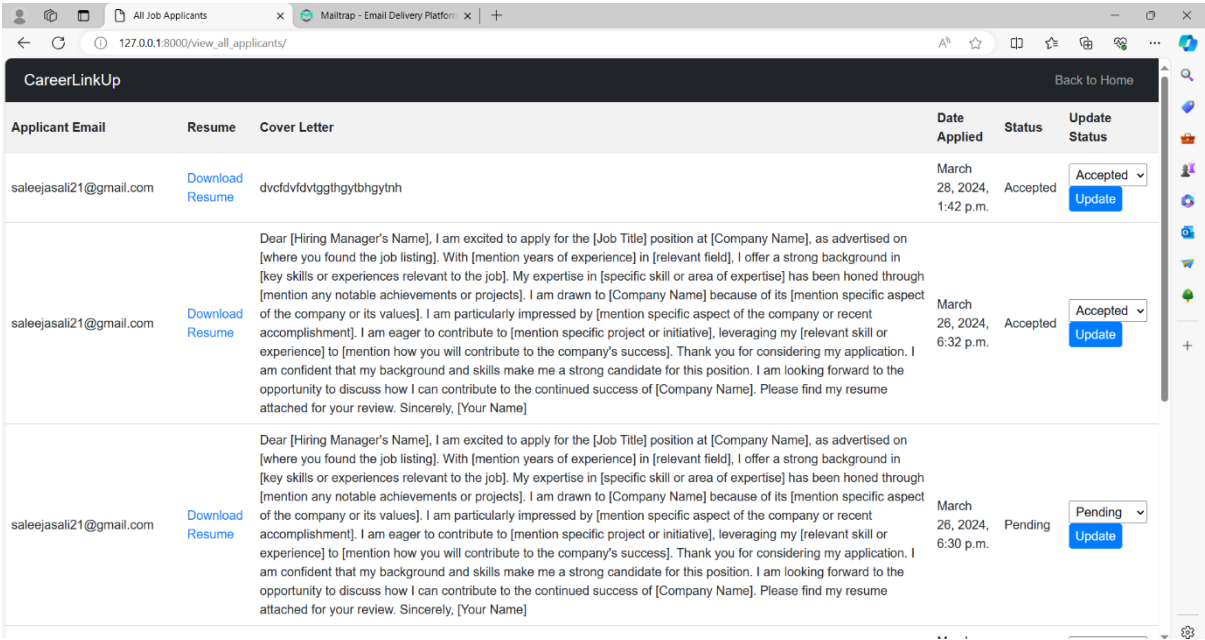

The interface displays a list of all the job listings posted by the employer.

There are action buttons for deleting and updating the job listing:

- **Delete:** Allows the employer to remove the job listing from the platform.
- **Update:** Allows the employer to edit the details of the job listing, such as title, description, requirements, etc.

Job applicants' interface:

Here, Document Download and Preview:

Each job application in the interface displays the applicant's resume.

Update Application Status:

Employers can update the status of each job application directly from the interface.

Each application displays its current status. there's an option for employers to update it.

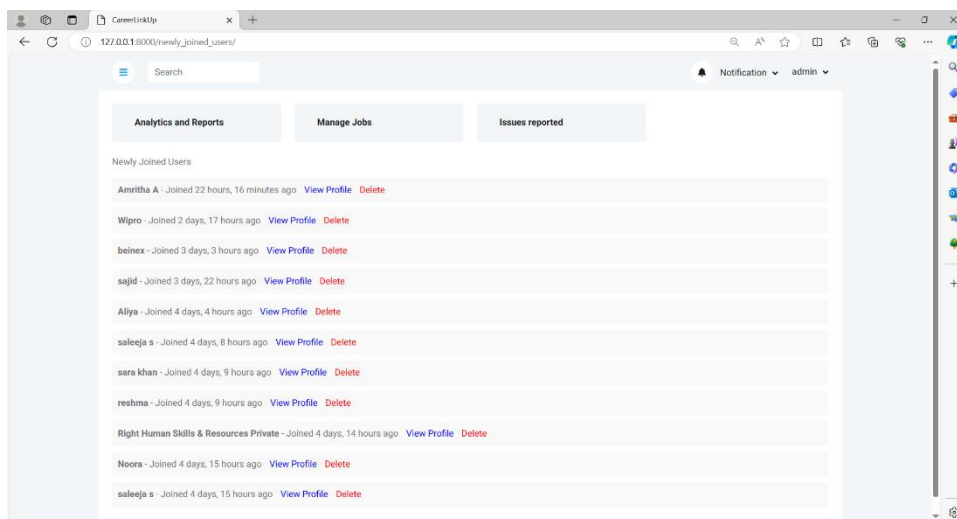

Email Notifications for Status Updates:

Whenever the employer updates the status of a job application, an email notification is sent to the applicant.

The email contains information about the updated status

Here also the employer can edit profile, report issues and logout.

Admin Page:

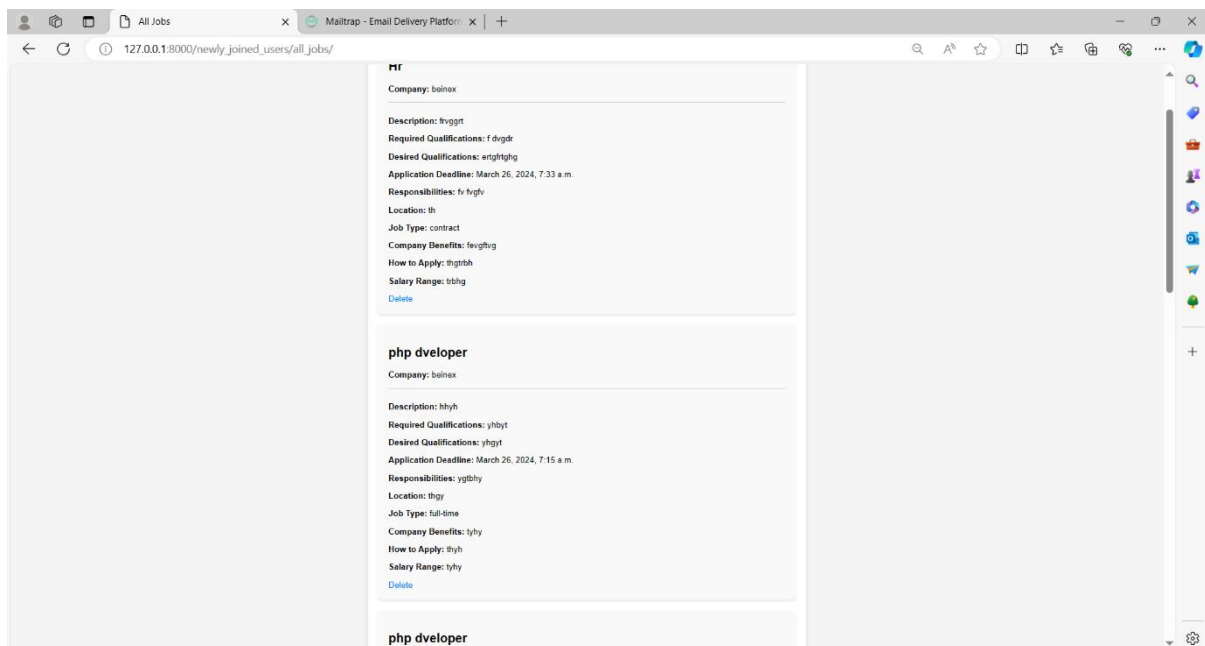

Analytics and Report:

The screenshot shows the Analytics and Report page. It features a table with two columns: "METRIC" and "COUNT".

METRIC	COUNT
User Count	12
Job Posting Count	4
Job Application Count	13

Manage Jobs:

- Display a list of all job listings on the platform with details such as job title, company name, posting date, and application deadline.
- Enable admins to edit job listings to correct errors, update information, or moderate content if needed.
- Provide the ability to remove job listings that are expired, inappropriate, or no longer relevant.

Problem Reporting:

- If a user encounters an issue or problem they can report it.
- The admin investigates and resolves the reported problem.
- Once the problem is solved, an email notification is sent to the users.
